ABOUT THE GERTI PROGRAM

GERTI's mission is to help transform long-term care services from an institutional model to a person-directed care model restoring dignity and choice while focusing on a meaningful life.

Through education and organizational analysis, GERTI works with all long-term care workers to teach person-directed care and services. Since 2003, GERTI has been teaching courses throughout the state of Kansas and now into Missouri. GERTI instructors have all worked in the aging field in a professional capacity, including: Registered Nurses, Directors of Nursing, State Regulator, and Nursing Home Administrator. One GERTI instructor is currently based in western Kansas and reaches all western nursing homes.

To date, GERTI has trained over 1,960 long-term care workers, both licensed and non-licensed.

As a not-for-profit organization, GERTI relies on your support to fulfill this important mission to enhance people's lives. Thank You.
